Round 2

1) Count occurrence of a given character in a string

Given a string and a character, task is to write a program which count occurrence of the given character in the string.

Examples:

Input:
geeksforgeeks
e
Output:
4
'e' appears four times in str.

Input:
abccdefgaa
a
Output:
3
'a' appears three times in str.

2)Third largest element in Array

Given an array of distinct elements. Find the third largest element in it.

Suppose you have A[] = {1, 2, 3, 4, 5, 6, 7}, its output will be 5 because it is the 3 largest element in the array A.

 It return -1 if there are less than 3 elements in the given array.

Example 1:

```
Input:

N = 5

A[] = {2,4,1,3,5}

Output: 3
```

Example 2:

```
Input:

N = 2

A[] = {10,2}

Output: -1
```

Your Task:
Write a program to print arrrays third largest element
